

Mack Leasing System[®]

The Perfect Solution.

Leasing: A smart decision.

By pursuing the leasing option, you've made a smart decision based on an efficient use of resources. Truck leasing enables you to take full advantage of new equipment without consuming valuable cash — or relying on traditional lines of credit — which can then be devoted to other business needs. The full-service lease adds even more benefits, with established maintenance and reporting procedures and predictable, pre-planned operating costs.

Now you can take your quest for efficiency one step further by choosing the best performing vehicles available and *dealing direct* with the experts who know them best: your local Mack Leasing System[®] member.

Covering your total transportation needs.

Mack Leasing System is an established and growing association of independent dealers and Mack[®] truck subsidiaries across North America. We provide:

- Full-Service Leases
- Contract Maintenance
- Rentals
- National Account Lease Sales
- FleetNet America (towing, repair, emergency)
- Road Manager Program

Sales, parts and service are all in one integrated, convenient package — each MLS member is equipped to handle all your needs. When you work with us you get a distinct advantage: a direct tie to an OEM. It means we know the vehicles we lease inside and out. Maintenance is easier. Downtime is reduced. You have access to a wider range of vehicles — all made by a legend in the trucking industry.
